Tesla for Business & Powerhub

Software tools for managing and monitoring Tesla Wall Connector for Business

Overview

Tesla for Business and Powerhub provide site operators with tools to **manage pricing, view charging activity, and monitor charger performance** across one or multiple locations.
These platforms support **transparent reporting, operational visibility, and ongoing site management** for commercial Level 2 deployments.

Tesla for Business Features

- Enable and edit pay-per-use pricing (where available)
- View charging sessions, revenue, and energy dispensed
- Download monthly statements and detailed charging history
- Manage access type, operating hours, and amenities
- Add and manage users with role-based permissions
- Enter Banking Details to collect monthly revenue remittance via ACH direct deposit (Tesla processes sales tax and our $0.03 service fee making this a seamless charging ownership experience)

Powerhub Features

- View real-time charger status (Available, Occupied, Reduced Service, Down, Unknown)
- Monitor connectivity, uptime, and utilization trends
- Access device-level performance metrics
- Receive outage alerts when chargers lose connectivity or go offline
- Use advanced graphing to compare devices and review historical data

Data & Reporting

- Session-level data: start/stop times, duration, kWh delivered, amount billed
- Site analytics: revenue, session volume, and energy dispensed over selectable time ranges
- Exportable reports for accounting, audits, or usage review
- Device list views showing uptime, connectivity, versioning, and power output

Site Management Tools

- Session-level data: start/stop times, duration, kWh delivered, amount billed
- Site analytics: revenue, session volume, and energy dispensed over selectable time ranges
- Exportable reports for accounting, audits, or usage review
- Device list views showing uptime, connectivity, versioning, and power output

Support

- Troubleshooting guides and Directory for local Tesla Certified Electricians to assist with any service related issues
- Alerts and diagnostic tools to help resolve issues or escalate when needed
